JavaScript Master Roadmap (2026)

Phase 1: Variables, Data Types, Operators, Type Conversion, if/else, switch, loops

Phase 2: Functions, Arrow Functions, Parameters, Return, Rest/Spread, Callbacks. Projects: Calculator, BMI, Age Calculator

Phase 3: Arrays and methods: push/pop, splice/slice, map/filter/reduce/find/some/every/forEach

Phase 4: Objects, this, destructuring

Phase 5: DOM, Events, createElement, appendChild, classList. Projects: Todo, Notes, Quiz, Weather

Phase 6: ES6+: Template literals, Modules, Optional chaining

Phase 7: Closures, Lexical Scope, Higher-order functions, IIFE, Recursion

Phase 8: Async JS: Event Loop, Promises, fetch, Async/Await

Phase 9: OOP: Classes, Inheritance, Encapsulation

Phase 10: Storage: localStorage, sessionStorage

Phase 11: Error Handling: try/catch/finally

Phase 12: Advanced: Hoisting, bind/call/apply, prototypes, event delegation, debouncing, throttling

Phase 13: APIs: REST, HTTP, JSON, CRUD

Phase 14: DSA in JS

Phase 15: Large Projects

Phase 16: React

Daily Routine: 30 min learning, 45 min exercises, 60-90 min projects, 15 min review.
